#### **Questions and Answers**

1. **Question:** On page 5 of the solicitation package, (I. SCOPE OF SOLICITATION), 2<sup>nd</sup> paragraph, it states,

"The Underground Storage Tank (UST) Management Division of the South Carolina Department of Health and Environmental Control (SCDHEC) is seeking services to perform active corrective action of a petroleum release at a regulated underground storage tank site in accordance with defined remediation goals. The objectives are to prevent significant further migration of chemicals of concern (CoC) and to reduce the CoC concentrations to or below site-specific target levels (SSTLs) established by SCDHEC."

The Tier II Assessment, (Crawford Environmental Services, Revision I, October 21, 2011) has been reviewed. Recommended SSTLs were not included in the document. Per the SCDHEC Tier II Assessment guidance document (December 6, 2005):

The purpose of the Tier II Assessment:

*" ... The results of the Tier II Assessment are to be used to establish appropriate site-specific target levels and recommendations for future actions as outlined in the South Carolina Risk-Based Corrective Action (RBCA) for Petroleum Releases document.*

For purposes of addressing this solicitation for corrective action:

- What is the established exposure point(s) ?
- Where is the established point(s) of compliance ?
- What are the established SSTLs ?

**Answer:**

The established exposure point used for modeling purposes is the southern property line of Stevens Funeral Home. The established points of compliance are the monitoring wells depicted on the site maps. The SSTLs for each of the respective monitoring wells (points of compliance) are listed in Appendix A of the bid solicitation.

2. **Question:** The Tier I report dated April 2010 provides a table of the former USTs stating the removals in August 2002. Is a copy of the UST Removal report available?

Images from Google Earth clearly show the presence of gasoline pumps. Usually during UST removals, pumps and product lines are included in the system removal. Can it be confirmed that all product piping has been removed or it was drained of product, cleaned, and properly abandoned?

**Answer:** The UST Removal Report is no longer available in SCDHEC's files. Therefore, the answer to this question is unknown.

3. **Question:** In section 3.5, Section A, Item 2 of the solicitation, entitled "*Minimum Requirements*" it states:

"Corrective action will be considered complete when: 1) the CoC concentrations are verified to be at or below SSTLs in all wells and sampling points listed in the Appendix, in all verification wells, in all treatment and recovery wells, and at any point in the area of concern for TWO CONSECUTIVE QUARTERS: ..."

In section 3.5, Section A, Item 9 of the solicitation, entitled "*Sampling*" it states:

"The Contractor must collect water samples from all monitoring wells and sampling points listed in the Appendix on a SEMI-ANNUAL SCHEDULE:..."

For clarification and costing purposes, semiannual sampling is required during the remediation phase of the project and then moves to a quarterly schedule during the verification phase of the project. Is this correct?

**Answer:** Yes, that is correct. During the remediation phase, the groundwater sampling will be conducted on semi-annual schedule. During the post remediation/verification, the groundwater sampling will be conducted on a quarterly schedule.
